OVERVIEW

Advancing Support Living is a regularly scheduled education program for providers involved with the Supportive Living Program (SLP). These workshops provide valuable information on relevant topics related to the SLP.

Experts in the field, including SLP providers that have successfully developed best practices in their industry, conduct the training. Topics presented contain information that can be used by SLP providers. In addition to the training content, ample opportunity for questions and answers, as well as discussion by and among participants, will be provided.

This event is jointly provided by **SIU School of Medicine** and the **Affordable Assisted Living Coalition**.

WHO SHOULD ATTEND?

This program has been developed specifically for providers of supportive living in Illinois, including but not limited to, Executive Directors, Administrators, Nursing, Business Office Managers, Marketing, Activity/Resident Services Coordinators, Culinary, and corporate staff.

REGISTER ONLINE: aalconline.org

SESSION DETAILS & OBJECTIVES

Care Coordination in the Supportive Living Setting

Stephen Harris, Teresa Wester-Peters, Martin Bukacek, Eric Spires, Julie Bringas, Deanna Taddei, Dr. Chris Kestner

This course is designed to increase participant knowledge of care coordination and provide strategies to meet three primary objectives:

- 1. Better Care:** Improve the overall quality of care by making healthcare more person-centered, reliable, accessible, and safe.
- 2. Healthier People, Healthier Communities:** Improve the health of Americans by supporting proven interventions to address behavioral, social, and environmental determinants of health, and deliver higher-quality care.
- 3. Smarter Spending:** Reduce the cost of quality healthcare for individuals, families, employers, government, and communities.

By the conclusion of this activity, participants should be able to explain how care coordination empowers healthcare providers to deliver better care by focusing on the following priorities:

- *Make care safer by reducing harm caused in the delivery of care*
- *Strengthen person and family engagement as partners in their care*
- *Promote effective communication and coordination of care*
- *Promote effective prevention and treatment of chronic disease*
- *Work with communities to promote best practices of healthy living*
- *Make care affordable*

Psychotropic Medications and Managing Behavioral Symptoms in Long-Term Care and Assisted Living Facilities

Eric Spires

By the conclusion of this activity, participants should be able to use non-behavior strategies as a first line of defense for specific behaviors.

If behaviors continue, have a better understanding of preferred psychotropic medications in relation to the behavior, that can help guide health care professionals when choosing medication.

Medicaid Update

Wayne Smallwood

This course is designed to inform attendees of the latest Illinois Medicaid Program information that affects the Supportive Living Program.

By the end of the session, attendees should be aware of current Illinois Medicaid policy and procedures that impact the Supportive Living Program and understand how it fits into their jobs.

Recognizing and Responding to Bullying in Supportive Living Facilities

Kellie E. Branch-Dircks, MSW, LCSW

This course is designed to change knowledge and competency of staff, as by the conclusion of this activity, participants should be able to:

- *Describe characteristics of bullying behaviors*
- *Learn the different types of bullies*

Successful Social Media Programs for Supportive Living

Janet Soule, Bill Bradley

This course is designed to change how Supportive Living communities view and use social media.

By the conclusion of this presentation, we will provide participants with direct knowledge of how to build a social media presence and give them easy-to-use tips for using social media to further enhance their brand.

Reducing Risk by Effectively Managing Critical Events

Jane Feagin, Stephen Harris, Teresa Wester-Peters, William Weiler

This Panel will review essential components of a Critical Event Risk Management Program:

1. Leadership Education & Technical Resources including Spread of Best Practices, Case Studies
2. Clear parameters defining a critical/sentinel event as well as the role of an effective critical event response team
3. Critical Event Toolkit
4. Eliminating Risk through Prevention of Critical Events
5. Lessons Learned & Top 5 Strategies all post-acute care providers should adopt to manage critical event risk.

- *Understand the psycho-social impacts of bullying behaviors*
- *Identify organizational interventions that may help minimize bullying among older-adults*
- *Pinpoint skills to share with older-adults to help them avoid being targets of bullying*
