

As the situations surrounding COVID-19 continues to evolve, AALC is committed to providing its members with access to important information that can reduce the risk of COVID-19 in your SL community. According to the Illinois Department of Public Health (IDPH):

"Current evidence suggests that novel coronavirus [COVID-19] may remain viable for hours to days on surfaces made from a variety of materials."

Therefore, cleaning and disinfecting environmental surfaces is critical! IDPH recommends that environmental cleaning and disinfection be implemented within the framework of your SL community's infection prevention and control program.

Learn more about environmental cleaning, disinfection, and monitoring from IDPH:
